## Experience

### CompCrafter - Product Designer and Full-Stack Developer

June 2024 to February 2025

- Designed and built CompCrafter, an AI-powered platform that helps users analyze and optimize their total compensation package.
- Led product design using Figma, creating intuitive UI/UX that simplifies complex compensation data.
- Developed the full-stack web application using Next.js (frontend & backend) and Supabase (database & authentication).
- Worked with AI models to generate insights, salary breakdowns, and benefit optimization suggestions for users.

### Paytrybe - Product Designer and Lead Mobile Developer

February 2023 to 2024

- Designed the user interface and experience of Paytrybe, a mobile application that allows African immigrants to send and receive money from their countries.
- Led the mobile development on both **Android** and **iOS** platforms, ensuring consistent and high-quality user experiences.
- Collaborated with backend developers to integrate **APIs** for seamless communication between the mobile app and server.
- Employed Flutter **CI/CD** with **Codemagic** for seamless code testing, linting, and deployment on **Android**, **iOS**.

### Shipday - Product Designer & Software developer

September 2021 to March 2023

- Designed the App and Website user interface and experience using **Figma**, incorporating feedback from users and stakeholders to create an intuitive and user-friendly application.
- Worked on the Front-end development of the Shipday platform, using **Flutter** for the **Mobile Application**, and **React** for the **Web** application.

## Projects

### Mrscrub

Designed and developed a house cleaning booking website for using **Next.js & Prisma**, the website allows users see cost of cleaning their house based on the details of their house like number of rooms and bathrooms, location e.t.c Integrated **Stripe** for seamless online payments [Website](#)<sup>↗</sup>

### Baptist Hymnal

Designed and Developed A Baptist Hymnal app for Baptist churches with support for multiple languages, responsive reading, and customization features like hymn Favourites and font size adjustment to **Accessibility**.

App has more than 50K downloads on [iOS App Store](#)<sup>↗</sup> & [Google PlayStore](#)<sup>↗</sup>

## Education

### Bachelor of Computer Science - CGPA: 3.82/4.00

Memorial University of Newfoundland Newfoundland, Canada  
September 2024

### Google UX Design Specialization

March 2021
